Fundamentals of Equity-Centered Online Course Design and Teaching

Designing online courses that center justice, accessibility, and student agency.

Course Description

This self-paced online professional development course deepens your understanding of instructional design paradigms, equity-centered design frameworks, and accessibility principles. You will explore design justice strategies, examples, and tools to create meaningful and engaging online learning experiences. The course also includes structured opportunities to reflect on your own design and teaching practices, drawing on the collective wisdom of experienced online faculty at Pitt.

Course Learning Objectives

- Examine and discuss instructional design paradigms, equity-centered design frameworks, and accessibility principles.
- Apply design justice and accessibility principles to inform your design ideation and decision-making.
- Design and develop programs and courses that intentionally center design justice and accessibility.
- Facilitate meaningful online learning activities and assessments that empower students' voice, identity, and agency.
- Engage in iterative course design through critical reflection using an equity-centered lens.

Audience

Faculty, instructional designers, and graduate students.

Instructional Modality

Self-paced, asynchronous online course.

Call to Action

Ready to redesign your online course with equity at the center
